

Cayenne®

The complete solution for your collaborative space:
storage, screens and power, all with distinctive style.

Cayenne private office solutions feature both low height credenzas and wall-mounted storage.

This collaborative space features storage cabinets used as a power spline. Yin yang stack-on cubes serve tenants on both sides of the storage spline. A metal modesty panel complements the metal storage and contrasts the acrylic screens.

This touchdown station includes floating top support legs and acrylic privacy. To add convenience-power at the work surface simply run cords from the floor through wire management corridors in the low storage cabinets.

Cayenne may be artfully paired with Metalworks' In-Line storage as an accent or for expanded functionality.

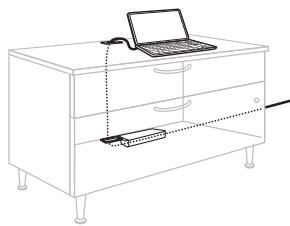

Cayenne low storage cabinets and credenzas are available with two drawer, open shelf, and rollout shelf options. Choose from four architectural leg styles to complement any private office or teaming space.

Cayenne Modular Power Solution

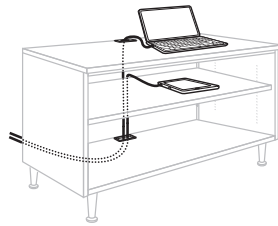

Each Cayenne low storage cabinet includes an internal corridor for wire management. Plastic, adhesive channels may be placed as needed to route cords laterally from cabinet-to-cabinet.

Modular electrical components with convenient, point-of-use access to power and data provide the full workstation solution.

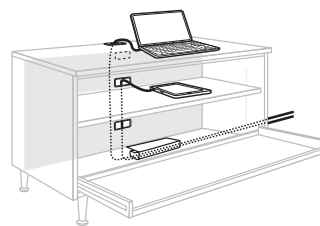

Two Drawer

Wires run top-to-bottom (or bottom-to-top!) through an internal wire corridor.

Open Shelf

Wires are fully accessible inside the cabinet.

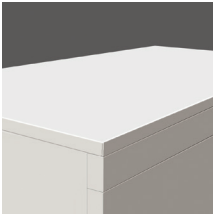

Rollout Shelf

Reach your wires via internal grommets.

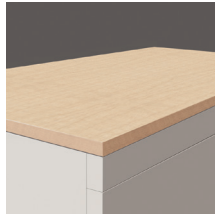

Choices to Complement Your Surroundings

A wide variety of colors, laminates, fabrics, drawer fronts, and locks are available to coordinate with your office environment. Our robust construction meets or exceeds the ANSI-BIFMA standards for durability and safety.
